

The Great Energy Transformation

Rise or Downfall of the Energy Community?

Overview

- Energy Community at the Crossroads
- European Energy Law – Stages of a short career
- The Green Deal: European Energy Law in Transition
- The Energy Community Countries: In Transition?

Energy Community at the Crossroads

- Once upon a time in 2005
 - Focus on markets and infrastructure
 - Focus on a sector

- The *acquis communautaire* – Gospel or Straight-jacket?
 - The reciprocity challenge
 - The enforcement challenge
 - The completeness and update challenge

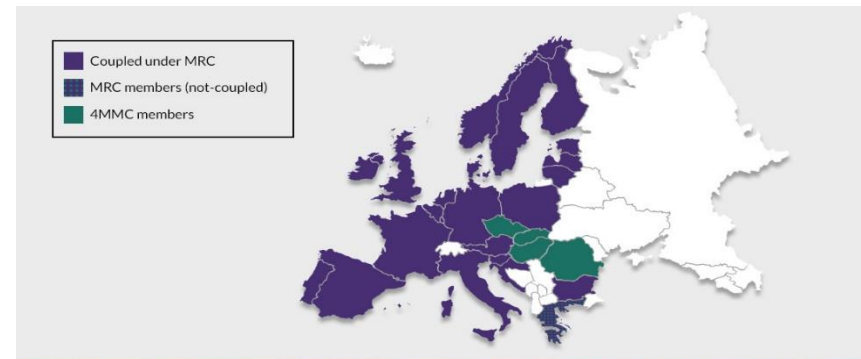

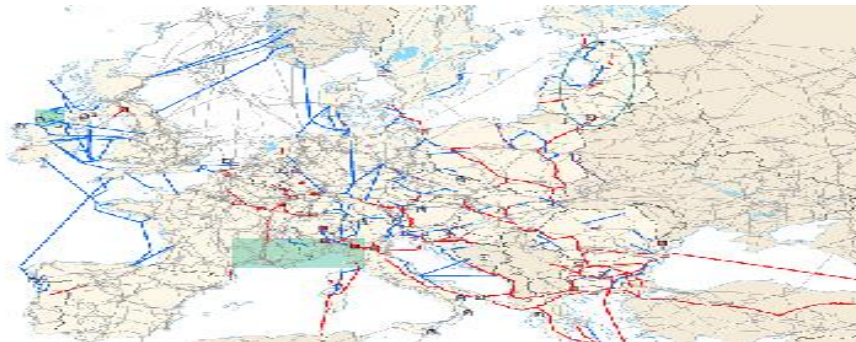

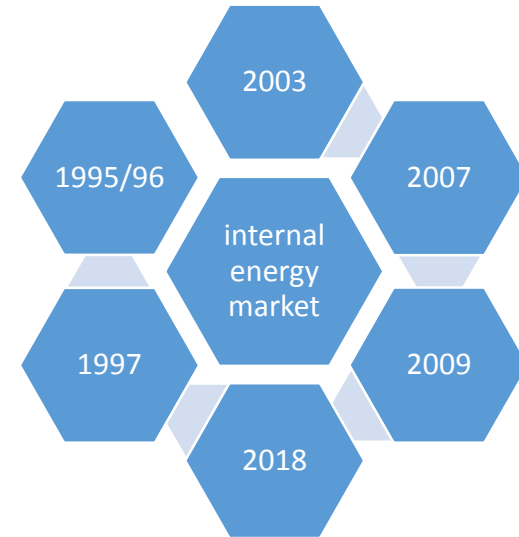

- The Green Deal and European Energy Law

European Energy Law – Stages of a short career

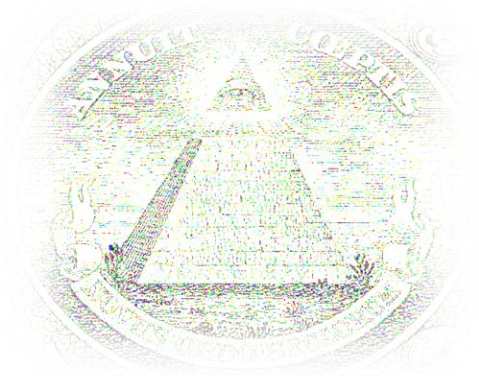

- US origins
- EU: From Paris to Paris
- Inbetween
 - A new Sector DNA
 - Completing the Infrastructure Map

How far did European Energy Law get us?

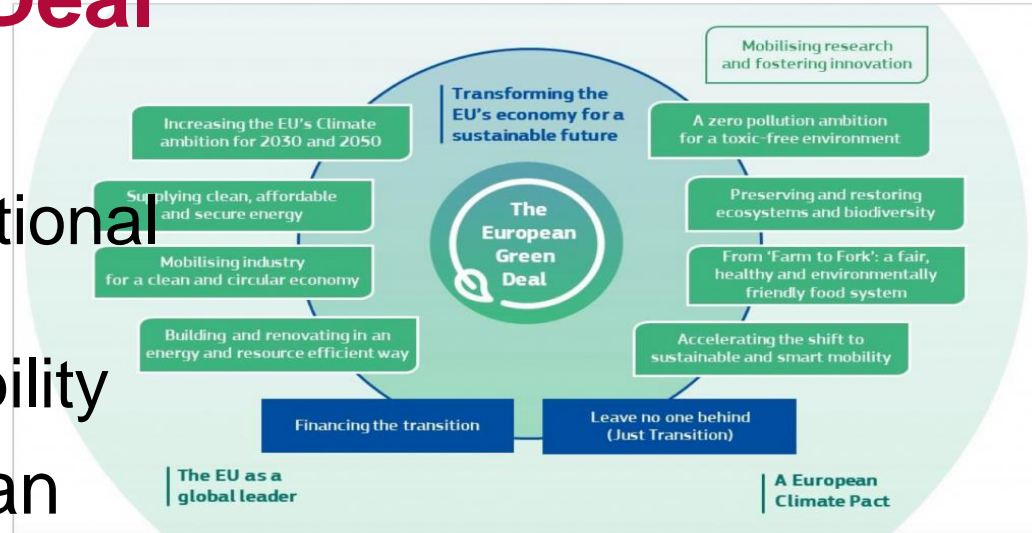

- The Power of Code: Establishing an Internal Market
- The Market Model: Still fit for Purpose?
- Fighting for Competences, a European classic
- Three Angles or three Silos?
- Moments of glory: External energy law

Enter the Green Deal

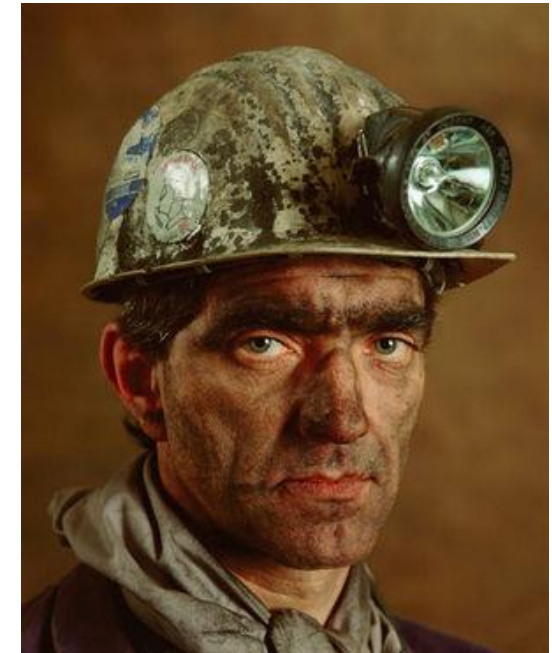

- Paris, on y va!
 - Common targets, national implementation
 - Plans and Enforceability
- A new Era for European Energy Law
 - Going holistic: The Energy Union
 - Going carbon-neutral: The Green Deal
- A Renaissance of the Law?

The Energy Community: In Transition?

- Law and Enforcement as Triggers
- Renewables on the Rise
- The Struggle for Common Targets
- Energy and Climate Plans vs Coal-Phase Out
- New Actors on the Scene
- The Missing Pieces
 - Carbon Pricing
 - Finance
 - Leaving Nobody Behind. Really?
